

System Management

Use Case Descriptions

Use Case: System Report	ID: 1	Importance Level: High
Primary Actor: Service Provider / Administrator		
Brief Description: The specified groups of users can extract a report with various metrics about the services they provide. The reports of the “service providers” will be limited to the services registered in their names, but the administrators of the system can generate reports over all the services available or previously available in the system.		
Trigger: Designated page for making system reports will call upon this functionality.		

Use Case: Administrator Creation	ID: 2	Importance Level: High
Primary Actor: Administrator		
Brief Description: Apart from the initial administration account created in the system, other administrator accounts have to be created by current system administrators.		
Trigger: Designated page in the system administration section.
